Q: Binding in XAML data grid not working I have a data grid in a Window/Page and am trying to bind the ItemSource. If I have the binding in code, it works and I can see the collection being used. If I set the ItemSource in XAML, the item collection will not be selected (but the row will be selected) and if I use a converter to cast the object to the List class, no item will be selected. Here is the XAML: Here is the code-behind: public MainWindowViewModel() { InitializeComponent(); Items = new ObservableCollection(TestData()); } private void Window_Loaded(object sender, RoutedEventArgs e) { DataContext = this; } public ObservableCollection Items { get { return (ObservableCollection)GetValue(ItemsProperty); } set { SetValue(ItemsProperty, value); } } public Telegram SelectedItem { get { return (Telegram)GetValue(SelectedItemProperty); } set { SetValue(SelectedItemProperty, value); } } Here is the implementation of
