NGU IDLE features dynamic, randomized gameplay and an active development team! More updates and features are on the way to NGU IDLE, like an RPG-like story, unlocking loot and more! NGU IDLE is a game of numbers, in which you win by numbers and lose by numbers. Just add up all of your numbers. You don't have to win, you just have to go higher than your opponent. Better yet, go as high as you can, so all of the numbers will go up. It's that simple. Key Features: • Hand-drawn and unique art! • Over 300 bosses! • Over 350 unique equipment, consumables, quest items, you name it! • Lend a hand to win, or sneak by with your numbers going up! • Lend your time to get higher numbers and are treated to a story and occasional cutscenes. (Really, it's a story!) • No pay2win • Progress through levels, loot, and unlock new features! Not much more to say, I really hope you like it! SURPRISE! This is a bit late, but here it is. As many of you know, I am preparing to launch a full time game development endeavour, which will take some time to launch. However, it will be made available to those who have been patiently waiting for so long. I haven't been able to post here in the past few weeks, because of having a young family and working my butt off in order to become a game developer. However, I am currently working as many hours as I can, every single day, in order to have a game launched and ready to play. Thank you so much for your patience! You won't have to wait long for NGU IDLE. P.S - The old discord is still active, if any of you want to support NGU IDLE 2.0! You can join the new discord here! NGU IDLE - An Idle RPG Shooter - (Please rate if you did!) By my time in the gaming industry over the past 15 years, I've come to the conclusion that currently, if you enjoy a game or have had that urge to get back in touch with your inner child, then you can find something that makes you happy. I have a feeling that some of you might like my latest game, NGU IDLE. NGU

NGU IDLE Product Key is a freaking Idle-RPG. You play as a Toy I mean, you party with a tablet, a Kitty, and a ball-shaped cat-nut I mean, companion. Your companion fights monsters and gives you items. The stronger the monster, the stronger your companion gets and the more items he can offer you. You control the pet, you control the companion and you control the tablet. You play as you want to play! Explore the world and its environment. Dungeons, cities, beaches, rocks, deserts, whatever! You want to play a normal Idle game, maybe hack some monsters, talk to the locals and store items/money in your Item Inventory and you're good to go! (You can even keep on playing while a new level loads on a rare occasion if you need to!) You decide what you want to do, but you do it in NGU Idle! You also get to join chatrooms. If you want to play in a chatroom, you can. You can chat about your Journey, ask for loot, joke around or simply camp someone and enjoy their experience! Every level feels brand new. Every time a new area opens up, you'll be like "Shit, I need to explore the new area in my next level." (The more you play, the more you discover, so levels up should not be a surprise) This game is not made to pull you out of your couch. By all means, if you need a break, take a break! But, you can also play more when you need to. You don't need anything fancy, it's a party game made by a group of friends. (Seriously, almost everything is made by friends from Valve, a pretty famous game developer for you to know about) You decide how you want to play. There's no Forced Exploration, just go wherever you want. The game auto saves. You're not sitting there refreshing and wondering if you saved or not. You can easily save whenever you want! And, when you need to save again, there is an autosave feature! You can pause the game anytime. You can even mess around with the game for as long as you want. But, you need to be able to be able to walk away from the game anytime. There's plenty of damage resistance, your companion keeps on healing you. You should avoid d41b202975

Guys, I made it! I played NGUIIDLE, and i just need advice from the people!! mean, remember, before you choose to play any game, you check the forums to see how good the game is?Well then, do your research on NGUIIDLE! I don't have any stats to hand (ironically) and I haven't really played much yet. BUT, just some observations i've had! (I'm sure people will pick these up) 1. As far as "Stuff to Loot" go, all of it has something to it (that's what I noticed) As you progress through the game, I'm sure you will encounter many stat boosting items, like Candy or something. 2. The weapon swappable feature is fantastic! Just stick some weapons in there, and then you have some really cute effects on the ground! (there's this one, it's really charming) 3. Weapons can be upgraded on almost any piece of gear, even on the Swappable Weapons that are literally hitting you in the face every second of gameplay. (*scratch* *scratch*) 4. There's a LOT of fodder to loot! I've gotten my inventory nearly full by just wandering around the maps, collecting everything! (and even some itunes stuff) 5. You can also lure monsters into your arms, and throw them against the walls, to knock them off balance and stun them. If you're patient enough, you might catch them with a weapon. Lure them with a Bed. That's how to get that Bed. It's like having a pet! 6. There's a different upgrade for every type of weapon. Say, you get a Melee weapon? You can upgrade it. It's basically a stat increasing perk! Stick it in there! It's like a set of perks! 7. Items are insanely over-powered! For example, you can go all throwaway with the Little Girl statue! She costs you 80+ guns, but if you upgrade that, you can just stick a Sword in there (one of the strongest upgrades) AND you can manage to get an obscene amount of damage on bosses as a Heavy Weapon using the Little Girl in that order! 8. Item Production is just like a real game. You can make lots of it, and use it to make others. (I've learned how to make a lot of Bombs (60 of them
