Q: How to split a String between two characters in Java Hi I have a String which is outputted by jsp. Now I want to split the string when there is a specific character such as in this case '|'. Is there any way to do this? Here is the string.

The '|' which I need to split is the second instance on the last line of this string. A: A really simple solution would be to just replace each '+' with ' ' (space), and then split by the remaining spaces: `String string = "+000000081-34-3411-111-5549474267852"; string = string.replace('+',' '); String[] parts = string.split(" ");` You can also use a regular expression to split at spaces and pipes: `String string = "+000000081-34-3411-111-5549474267852"; string = string.replaceAll("(?m)^\s+([\s\+]*)\s+$", "$1"); String[] parts = string.split("\\s*(?=\\+)(.*)\\s*");` (?
