Start typing in the search field and press `.` (the `;` character) and then press `Enter`. If you typed `a;b` (not `a; =b` or `a;b=`) before typing `.`, the search field only displays `a` and `b` and you won't be able to type the `;` character. If you accidentally typed `=` and then pressed `.`, this will result in only typing `a` and `b` in the search field. 4. To search for a field with the name **File Data Origin**, simply start typing that in the search field. The `File Data Origin` field will then display below the search field.
