Reclmg ManagerQ: What is the proper way to break a match on \r (crLf)? In javascript, the easiest way to detect whitespace character, (line break) or \r (return) or \t (tab) or \u200c (zero-width space) or \u200d (zero-width space), etc, is to use the following regex: \s : Matches any whitespace character \S : Matches any character that is not a whitespace character But what about \r ? It is also a whitespace character. \s*\r \S* : 0 or more white space character, followed by 0 or more white space character (line break), followed by 0 or more character that is not a whitespace character. \r : Matches only line break, and the is not optional in \r . Is it also true that the \r in \r is not optional in \r ? A: Ok, so the regex : \s*\r \S* is a line break matcher. \r is a line break. What you have written : \r : Matches only line break, and the is not optional in \r is correct. The is not optional in \r
