Played by real-life athletes, the Digital Intelligence System (DIS) in FIFA 22 is the brand-new artificial intelligence engine that governs every player, teammate, opponent and ball interaction in the game. It uses this dataset to create a cohesive experience, with every player receiving the same level of attention and focus in every decision that you make. Unlike previous versions of FIFA in which the AI would focus on rigid strategies, returning to its first instincts and going with what it learned from past games, this new AI has the ability to adapt and learn, based on what you do in-game. "We are extremely proud that the new FIFA has some of the most advanced AI in any sports game," said Greg Goodrow, Executive Producer at EA Canada. "In FIFA 22, we saw a great opportunity to take advantage of the high-end player models and motion capture data to create some of the most detailed, authentic and unpredictable AI we have ever created." FIFA 22 introduces "HyperMotion Technology," which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay. Features Key:

- Player Masterclass: Step behind the scenes of each PRO in the cast of 22 to see their habits, work and a behind-the-scenes look at what it takes to reach the pinnacle of their profession.
- New player identity: Sensible new looks for each PRO with more customizability.
- FIFA 22 – an authentic football experience that brings to life the game of football like never before.
- Hyper Motion Technology: Immerse yourself in full-frame player motion capabilities and fluidity. With the most finely tuned engine on the market, pro motions are recreated at ease with this revolutionary technology and an even better stadium experience.
- Mechanical Intelligence: Next-gen performing players respond to new challenges and situations in a new, completely individual way.
- Live in the World: Coarse, tundra-like surfaces, grass, or the diverse, sunny rooftops from around the world bring a rich, diverse 3D experience to every vista.
- More ways to progress: Climb the ranks of Pro Clubs and playing achievements to unlock new career experiences. Make your own story – with no set-in-stone parameters.
- Make your way to the top: New challenges through new modes, enhancements and improved management tools. Get your hands on your first-ever coaching licence to roll back the clock and step into the coaching box.
- Impressive CB features for the World's best players: New data-driven defensive and attacking CB models bring intensity to the concept of being a defender. CBs can be controlled independently on the pitch, run throughs won't feel like throughs, and crosses from well beyond the box will look and feel different.
- A more physical Real World: New ball physics and triangulated surface recognition technologies bring more accurate ball control and a new level of physicality to the game.
- FIFA World Cup 2018, FIFA 19 with Ronaldo, Jürgen Klinsmann, FIFA 2018 World Cup and FIFA 19 - World Cup Edition.

EA SPORTS FIFA 20 - FIFA 20 introduces all-new methods to play and view the beautiful game, and introduces exciting advances that reimagine the way you play. EA SPORTS FIFA 20 introduces all-new methods to play and view the beautiful game, and introduces exciting advances that reimagine the way you play. FIFA 20 is the best soccer videogame ever. I would not be surprised if one day we will be able to get real football players on the pitch as they will be looking at the controller. This game is great. The gameplay is fantastic, but this is something I wish they would have done earlier on because it just feels a little lackluster compared to the other game modes. The fact that you can't use the net as the header is really disappointing. This game is great. The gameplay is fantastic, but this is something I wish they would have done earlier on because it just feels a little lackluster compared to the other game modes. The fact that you can't use the net as the header is really disappointing. Unfortunately it's also not fun to play at the pace this game sets. It takes almost two minutes to play a match. Not that I'm complaining though. This game is going to sell so well that it's not worth it. I don't want to pre-order because it's way too expensive. I wouldn't say that I have bad memories, but I haven't been to this year's E3 and I don't know what they were showing. It's going to be quite expensive this year. I'm pretty sure this game won't sell well at all. I don't want to pre-order because it's way too expensive. I wouldn't say that I have bad memories, but I haven't been to this year's E3 and I don't know what they were showing. It's going to be quite expensive this year. It feels like a very, very good PC game. People complain about the gameplay, but bc9d6d6daa

Choose your team from over 40,000 real-world international players – and add to the squad as you discover the world of football. Buy, sell, trade, negotiate, transfer and manage your way to glory. Everything has its place in Ultimate Team – bringing together real football and real footballers, seamlessly, in FIFA 22. Kicks – FIFA 22 delivers a comprehensive range of dynamic new gameplay features. Skillful players will be able to master any surface in FIFA 22 with the refined control system, including a new passing system that lets you choose exactly which pass to make and control the direction of the pass with just the right amount of force. Players will feel even more in control with the new Impact Engine, which provides feedback that allows the players to better sense the ball, the forces of each tackle, and the weight of passes. The system has been tuned to allow players to move smoothly and consistently adapt their game to the type of surface they are playing on, and give them the confidence to play more precise, passing football. Tackling – FIFA 21 introduced the first major overhaul of tackling in a FIFA game. This year, we're continuing to modernize gameplay features to deliver a player-first experience. The new animation system, more responsive controls and ball physics make playing better tackle animations a breeze. The new approach offers players a more realistic experience by incorporating physics into the animation system, from initial strikes and contact with the ball, to body part interactions, all on a realistic surface. Possession – Possession has been one of the biggest changes to the sport over the last decade. The new enhanced tackling system and refined controls and animation bring FIFA 22 into the possession game, giving players full control and authority over how they control the ball. In the new system, anytime a player makes contact with the ball, the action and visuals change to show how that player has it in control. With the new animation system, every player has their own set of animations for how they protect the ball, how they pass and shoot, and how they can be tackled. These animations help to add to the realism and authenticity of the game, helping to make every player, every touch, and every passing action unique. Moves – Moves have become a critical element of modern football. To help bring a more realistic feel to these moments, FIFA 22 is introducing a new animation system that creates individual animations for every football player on the pitch. The

What's new in Fifa 22:

- **Brilliantly balanced gameplay. New collision logic, new dribbling AI, and player positioning will help you become a force to be reckoned with on the pitch.**
- **Release the Phenom, give him a pitch and let him unleash his wicked skills. FIFA finally takes skillshots seriously and offers its own take on the world's most celebrated movement.**
- **Over 150 new Superstars, including Neymar and Gareth Bale.**
- **New goaling system, dynamic ball physics, and tactical options. Real-world collisions will reward and punish players during matches and new playmaker tools will help you keep an eye on the path the ball will take.**
- **EA SPORTS DNA. Nearly every aspect of FIFA has been designed to give players an intuitive and realistic experience that everyone can enjoy.**
- **AI that reacts like a human coach. All-new AI improvements give AI players more insight into what you're doing and how they can use that information to help you win.**
- **Stunning visuals, all-new lighting and weather effects, player models made even better and thousands more stadiums.**
- **New Last Touch mechanic. During a match you can use the last touch system to coordinate attacks with your teammates and demonstrate that you're as good as you are by collecting quick taps on the ball to send it clear.**
- **New club badges and squad inscriptions—players will be more personal than ever before when looking out for medals, friends, and quality time with family.**
- **Dynamic jerseys, brand new boots, and the most realistic celebrations in any sports game.**
- **Adaptive commentary. If you're new to football or a veteran, the commentary will help you every step of the way.**
