Awkward Skype has been updated with a number of new, useful features, including support for cloud recording and a private messaging feature. The app previously allowed users to record conversations and automatically translate from one language to another, but with the new update, this functionality has been added directly into the app. The new update also allows users to send a private message to any of their contacts in the Skype app, as well as being able to reply and forward messages within the app. Private messages and replies can be sent directly from the alert pop-up of any conversation. It seems that the app has also received further stability improvements, with users telling us that they've been able to use the app at full speed for much longer. There's also a new setting to adjust the volume of both incoming and outgoing calls, as well as being able to remove the app's interface indicator from the status bar. You can download Skype for iOS free of charge from the App Store.I've been waiting for this to be released for a while, but it's quite upsetting, that it took so long.
