| **Lightroom** | --- | --- | --- Lightroom may not have the name recognition of Photoshop, but its power and efficiency make it an excellent tool for those in professional photography. Adobe offers Lightroom standalone software that can run on a computer. However, in this book, Lightroom is used in combination with a digital SLR camera, and the companion software runs on a computer connected to the camera. This enables the software to import photos from the camera and adjust those photos in the program. The **Basic Controls** of Lightroom include a viewport, a histogram, and a toolbar. In addition, the interface offers specific features for **developing** a photo. The new features of Lightroom 5 let you easily create an array of Slideshow and **Video** movies. You can create movies that can be played in either portrait or landscape format. You can also choose from a variety of transitions and special effects, and you can use photos or video clips. (Make sure to check your local software requirements.) **Figure 7.3** : Using Lightroom, you can customize your slideshow or video. **Figure 7.4** : Using the Histogram feature, you can see the lightness or darkness of each pixel in an image. Photoshop and Lightroom are both excellent programs and have many uses. The larger size of the Adobe Creative Cloud accounts makes it possible for individuals and teams to share images and projects and collaborate on them. The Adobe Creative Cloud service, available only to professional photographers and graphic designers, provides the digital equivalents of desktop software, storage, and productivity tools. With the Creative Cloud, users can do most of their work online, but access their files on any computer. Each registered user has access to a single, downloadable Creative Cloud with all of the programs and storage space they would need to work. **Figure 7.5** : Digital images can be viewed and shared online with the Creative Cloud. * * * # Understanding Photoshop There are seven primary editing tools in Photoshop: * **Blur:** Blur creates a subtle out-of-focus effect. * **Brightness/Contrast:** Brightness/Contrast enables you to make tonal adjustments to the image. * **Color:** Color adjustment options enable you to change the hue and saturation of colors in an image. * **Curves:**

If you're trying to decide whether you should take a course on Photoshop or use the free version of Elements, here's a couple pointers to help you decide. 1. If you really enjoy using the professional version of Photoshop, don't mind paying an annual subscription, and don't need more advanced image editing features than you already have in Elements, then Photoshop is definitely worth the investment. You're likely to find it more useful as a way of creating high-quality images than you'd use the free version of Elements. 2. If you're interested in digital photography or graphic design, don't mind having to pay a monthly fee, and don't need more advanced image editing features than you already have in Elements, Elements might be the better choice. Most of your image editing will be a two-step process: first, you will use Elements to crop and adjust the images you take, then you will save the images you have altered using Photoshop. You'll find this process easier using Photoshop as you already have the skills to use the software. 3. If you aren't doing any photo editing but find yourself occasionally creating an image with effects or cutting a shape out of an image, Elements will give you what you need and it's free. 4. If you are regularly creating images with graphics, effects, and editing using advanced tools, Photoshop can be a great way to create your own images and do your own work. Alternatively, you might be doing a lot of work with a professional graphic designer on images that have already been created. In any case, Photoshop is great for creating images, but don't think you need a course to learn how to use it. There are lots of good tutorials for Photoshop online, and Adobe has a large library of courses to help you get started. What to look for in an online Photoshop course So how do you know which online Photoshop course is right for you? Here are a few things to look for: Top courses and the best course providers The best courses will include: Clear step-by-step instructions with lots of screenshots, explanations, and videos. Lots of expert advice. Clear assignments and homework. Bonus resources, worksheets, and extra practice with more exercises. A preview of what 05a79cecff

An in vitro evaluation of the efficacy of antimicrobial agents against spirochetes isolated from naturally infected animals. The in vitro efficacy of 11 antimicrobial agents against spirochetes isolated from bovines, cervids, dogs, equines, rabbits, and roe deer was evaluated. Sixty-five spirochete isolates were obtained from cases of spirochetosis in each of the animal species and were subjected to antimicrobial susceptibility testing. An antimicrobial agent was considered to be effective when its minimum inhibitory concentration (MIC) was 17A One in Every 100 Births Is by Caesarean Section A new U.S. study finds that 1 in 100 births is by C-section. Maternal risk factors are associated with increased risk of undergoing a C-section. C-section births are associated with increased risk of future cardiovascular and metabolic diseases. FRIDAY, Nov. 24, 2019 (HealthDay News) — One in every 100 births is now by C-section in the United States, according to a new U.S. study. Over the past few decades, the number of cesarean deliveries has risen at an alarming rate. In 2016, the U.S. rate of C-sections was 32%, according to the Centers for Disease Control and Prevention. The U.S. rate of C-section births was at only 19% in 1970. Researchers speculated that the increase in C-sections was due to the fact that women were asking their doctors for them more often. But the numbers climbed steadily after that, according to the study. In 2016, more than 1 in every 100 births was by C-section in the United States. While the C-section rate is high, the

Q: How to change a tabBar after a push segue In my app I need to change my tab bar that will be changed after a push segue in real time when the user does not interact with the app (using a timer) @IBAction func timePressed(_ sender: UIButton) { if self.time.text == "00:00:00" { self.time.text = "00:00:00" NavigationController?.popToRootViewController(animated: true) } if self.time.text == "00:00:00" { self.time.text = "00:00:00" Global.timer = 1 } if self.time.text!= "00:00:00" { Global.timer -= 1 self.time.text = "00:00:00" } } The segue action is called correctly but my text is not changed. I have searched a lot but could not find an answer to solve this. A: If you want to change the tab bar when the timer runs out you have to save the tab bar in a variable and then change it with the following code. if self.time.text == "00:00:00" { Global.tabBarController = self.navigationController self.time.text = "00:00:00" NavigationController?.popToRootViewController(animated: true) } if self.time.text!= "00:00:00" { Global.timer -= 1 self.time.text = "00:00:00" } On exit from the tab bar Controller update tab bar
