The error is: 'make' object has no attribute 'children' I am assuming that it is because the 'children' line is wrong. But I am not sure how to change it. I am making a game where

you can delete rooms from a room-list by entering their room name into a list. I am using two lists. one to name the rooms. one to list the room-children. The purpose is that you enter the room name into a text-box. You click 'delete' and the list updates to show the room no longer exists. Here is the error line. if self.name =='saves': save = self.children[self.name] print("deleteing") del self.children[self.name] save.delete() Here is the code: import random import time class Room: def __init__(self, name): self.name = name self.children = [] self.clearsave = False self.stats = {"x af5dca3d97
