CATIA. It is more efficient in general use for repetitive tasks. If the design is for a simple product such as a house, a car, or any other type of manufactured item, the design can be completed in less than three hours. Design complexity and detail can be extended in 2D drawings. CAD features such as the ability to work with several formats, such as file format, and rendering formats such as wireframe and solid color. CAD features such as the ability to view, annotate and edit CAD files. CAD features such as the ability to create and edit the entire project in a single file. CAD features such as the ability to have various versions of the design and the ability to undo and redo changes. CAD features such as the ability to view the result of the project in any device such as a printer, a monitor, and a camera. CAD features such as the ability to include or hide any part of the 3D model. CAD features such as the ability to make modifications to the model in 3D without creating separate 2D drawings. CAD features such as the ability to convert 3D models to an AutoCAD drawing. CAD features such as the ability to see the changes in real-time. CAD features such as the ability to create animations.
