I have a scenario where I need to send a message to a group of all the subscribers. I can create a type of Sender that does this? how? Thanks! A: Unfortunately, Rebus does not have the concept of "sender". Sending a message means sending it to all subscribers (on all queues). If you want to send messages to a subset of the subscribers, you should either: Write code to query the subscriptions table (with the @Subscribe annotation) and send the message to the right subscribers Create new types that can represent different users and have their own methods to handle the messages In both cases, both (creating new types and sending messages) would be handled by

Marco Rubio (R-Fla.) speaks during a hearing on intelligence committee activities and legislative proposals to improve intelligence in the committee in Senate Chamber on Capitol Hill, March 12, 2014. Photograph by: Roberto Machado Noa/Staff, Reuters Mr. Speaker, the deeply disturbing report issued by a U.S. watchdog group, hardly a sympathetic source, provided extraordinary clarity about America's relationship with Pakistan in the aftermath of the Osama bin Laden raid and has raised serious questions about a failed American effort to negotiate the transfer of bin Laden's corpse. The report revealed that Army Gen. Raymond A. Thomas, the head of the U.S. Special Operations Command in his previous role as commander of U.S. forces in South Asia, told U.S. lawmakers he was warned by senior U.S. officials 6d1f23a050
