The biggest addition to Photoshop, however, is the new AI editing tools built directly into the program with the Adobe Sensei service. This service sets new standards on how editing in Adobe applications can be improved. AI edits include:

- Photo Restoration — remove blemishes, whiten teeth, brighten shadows, and more
- Face Recognition — detect the faces in your images and then match them to your photos in your client library.
- Color Layering — use different color tones on an image to remove or add certain objects and then copy and paste them as layers.
- Face Rigging — generate multiple facial expressions of your subjects and then use brush strokes to ‘animate’ them — e.g. fade into different social emotions.

Fast, cleaner previews: The updated previews in Lightroom 5 make reviewing your images significantly faster. All the details you’ve tweaked are automatically included in every preview. Over 200 million people use Photoshop every day to create images, videos, 3D models and web graphics. One of the most crucial aspects of the Photoshop experience is collaboration.

When you’re working on a file, sharing it is the best way to get feedback and ensure everyone is onboard.

Now, anytime you save a document, you’ll see a Share button in the upper-right corner.

If you’ve set up the Document Sharing preferences to share files using ADP services, you’ll see both buttons appear on the toolbar.

Just select a Share Service listed in the Document Sharing dialog to choose which file formats will be automatically shared for review.
